SHORT BIO

I am currently an undergraduate student in Electronic Information Engineering at Huazhong University of Science and Technology, where I serve as Captain of Dian Team and Lead of its Robotics Group.

I closely follow frontier research in embodied AI and robot learning, with a strong interest in identifying practical problems and formulating feasible technical ideas. I combine research intuition with hands-on engineering by reproducing representative models, adapting them to robotic training workflows, and validating ideas on open-source robotic arms. My long-term goal is to build general-purpose robots that learn robust skills and assist people in the real world.

RESEARCH INTERESTS

Embodied AI; Robot Learning; Real-World Robot Deployment.

EDUCATION

Huazhong University of Science and Technology

Sep. 2023 – Jun. 2027

B.Eng. in Electronic Information Engineering

Project-Based Information Engineering Experimental Class (“Seed Class”); Weighted Average: **84.5/100**; CET-6: **519**.

COMPETITIONS AND PROJECTS

ICRA 2025 Sim2Real Challenge

2025

Core Member, DianRobot

- Designed and evaluated tabletop bimanual grasping strategies for objects of different shapes and categories, including action-sequence debugging, rollout analysis, real-robot validation, and challenge demonstration preparation.

Robotic Arm Application for Chemistry Experiments Based on Imitation Learning

2025

Provincial Undergraduate Innovation Project; Team Leader

- Led task decomposition, data-collection workflow design, imitation-learning training, real-arm testing, and grasping experiments for chemistry-lab instruments.

Robot Coffee-Making Based on Reinforcement Learning

Jul. 2023 – Apr. 2024

Industry Collaboration Project with CloudMinds Robotics

- Built the coffee-service demonstration workflow; supported cup grasping, localization, and success-check modules; addressed joint zero-drift through visual compensation.

PUBLICATIONS

- [**ICTC 2026**] Yefan Lin, **Jiaxuan Wang**, Baoyu Liu, Zheng Lv, and Xiaojun Hei, “Pallet-ACT: A Unified Data-Training-Inference Framework for Industrial Robotic Palletizing.” *7th Information Communication Technologies Conference*, Nanjing, China, May 2026. **Accepted**.
- [**ROBIO 2025**] Yuhan Huang, Zijian Ning, Ziyuan Wang, **Jiaxuan Wang**, Xiaojun Hei, “Reinforcement Learning with Stage-Wise Model Fusion for Sequential Object Manipulation Tasks.” *IEEE International Conference on Robotics and Biomimetics*, Chengdu, China, Dec. 2025.

AWARDS

- ICRA 2025 Sim2Real Challenge:** International Second Prize, 4th Place Worldwide.
- Chinese Collegiate Computing Competition (4C), Central-South Division, Undergraduate Group:** Second Prize, 2024, for “Reinforcement-Learning-Enabled Robotic Coffee Service Application.”
- Robotic Arm Application for Chemistry Experiments Based on Imitation Learning:** Provincial Undergraduate Innovation Project, Team Leader, rated Excellent, 2025.
- Dian Team Reception Robot Application Design:** University-level Undergraduate Innovation Project, rated Excellent, 2023.

TECHNICAL SKILLS

- Robot Learning:** reinforcement learning, imitation learning, robotic control, Pi-series vision-language-action (VLA) model reproduction.
- Robotics Stack:** 6-axis robotic-arm operation and deployment, ROS 2, MoveIt 2, MuJoCo simulation, real-robot data collection.
- Engineering:** Python, C, PyTorch, NumPy, OpenCV, Git, Linux, SolidWorks, 3D printing.
